

How to get a UPI QR Code for your Business:

To accept digital payments, you need a business UPI QR code.

1. Download a business UPI app: Popular options include Paytm for Business, PhonePe Business, Google Pay for Business, or BharatPe.

2. Sign up with your mobile number: Use the number linked to your bank account.

3. Add your business details: Provide your name, business name (e.g., "Priya's Fruit Stall"), and business category.

4. Link your bank account: Select your bank and allow the app to link your account securely.

5. Get your QR code: Once setup is complete, the app will generate a unique QR code for your business. You can find it in the "My Profile" or "Show QR" section. Print this QR code and display it at your stall for customers to scan and pay.
